EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with David Olynick (Reg# 48,615) on January 4, 2006.

The application has been amended as follows:

Claim 11 (amended). A method of obtaining a game license on a gaming machine providing a game play of one or more games, the method comprising:

providing a gaming machine comprising a 1) housing, 2) master gaming controller coupled to the housing that controls a game of chance played on the gaming machine and determines the outcome of the game of chance wherein the game license is associated with the game of chance; 3) a first input mechanism, coupled to the housing, for receiving and storing money or indicia of credit input to the gaming machine; and 4) an output mechanism, coupled to the housing, for outputting money or a tangible indicia of credit redeemable for cash from the gaming machine resulting from outcomes for the game of chance determined on the gaming machine;

under control of the master gaming controller, determining license data is needed for the game of chance while the game of chance is available for game play on the gaming machine;

under control of the master gaming controller, generating a game license request message to request the license data;

under control of the master gaming controller, sending the game license request message to a remote server;

under control of the master gaming controller, receiving a game license reply message from the remote server including the license data;

under control of the master gaming controller, updating the game license using the license data on the gaming machine.

2. Claims 11-24 and 32-60 are allowed.

The following is an examiner's statement of reasons for allowance: The cited prior art, Weiss US Patent No. 6,364,769, Ahmad US Patent No. 5,925,127, and Bruce Schneier's Applied Cryptography teaches components of a gaming machine and licensing techniques for rented software programs, but fail to teach or suggest determining license data is needed for the game of chance while the game of chance is available for game play on the gaming machine and generating a game license request message to request the license data" (see Applicant's response dated 10/11/2005 page 15). The cited prior art therefore fails to anticipate or render obvious the above-cited claims.

Art Unit: 2134

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
